

The AI workforce for Australia's 2.5 million small businesses — ***sold the only way SMEs buy: risk removed.***

AAA by Artigellence builds production-grade AI agents that run the admin drowning Australian SME owners — quoting, invoicing, reception, reconciliation — sitting **above** the tools they already use (Xero, MYOB, ServiceM8, Cliniko), never replacing them. Consulting cashflow today; productised industry agent-packs next.

THE PROBLEM — QUANTIFIED & NATIONAL

14 hrs/wk

lost to manual admin per Australian manager · Dext / ServiceNow 2025

\$30K / yr

avg cost of late payments per SME · GoCardless 2025

76%

of Australian SMEs have no AI strategy · National AI Centre 2025

2.8×

faster growth for AI-using SMEs — the window is now · MYOB 2026

THE MODEL — PRICED PER PIECE, PAID ON DELIVERY

Phase 0 — Diagnostic pilot	A\$4,500 · refundable
Phase 1 — Agent build (min 4)	A\$3,000 / agent
Phase 2 — Retainer	A\$1,750–3,500 / mo
Standard Year-1 client value	A\$56,500

All incl GST. Agents paid only on delivery. Clients own everything — no lock-in. API run-costs pass through at cost.

THE WEDGE — RISK REVERSAL

SME owners don't buy AI promises. AAA's entry is a **fully refundable A\$4,500 pilot** — first working agent on the client's real data by day 10, every dollar back through day 30 if it doesn't earn its place. The strongest risk-reversal in the Australian market: it converts the sceptical majority competitors can't reach.

TRACTION — EARLY-STAGE, HONESTLY STATED

- Live platform + AI concierge shipped — [aaa.artigellence.com](#)
- 6 industry verticals live with dedicated pages
- Several paid engagements underway — clients across multiple Australian SME industries
- Partner channel defined — up to 33% recurring for referrers

WHY THIS SCALES BEYOND CONSULTING

- Repeatable IP, not hours.** Every engagement hardens reusable industry agent-packs (trades, clinics, accounting, legal, medical, food distribution) — build once, deploy many.
- Solo-operator economics.** Founder-delivered with AI leverage: minimal fixed cost, services margins funding product development — not burning investor capital on overheads.
- Distribution that compounds.** Accountants, bookkeepers and integrators sit on hundreds of SMEs each; the partner tier turns them into a recurring referral engine.
- Model-agnostic architecture.** Agents sit on abstraction layers — switching LLM providers is hours, not rebuilds. No platform dependency.

THE MOAT

- 25 years' regulated consulting — 4 industries, 38 countries — applied to AI delivery.
- Refund-backed delivery discipline: falsifiable, sourced claims only. Trust is the product.
- Australian-compliance-aware builds (Privacy Act, AHPRA-adjacent workflows) — where offshore agencies stumble.

The unit maths: one Standard Year-1 client = **A\$56,500**. Capacity, not demand, is the constraint — a solo operator caps at 3–5 concurrent clients. **100 Standard clients = A\$5.65M revenue** — reaching it requires productised packs + delivery capacity. That is precisely what this raise builds.

ONE ENGINE · FOUR REVENUE DOORS — A LADDER FROM A\$595 TO A\$56,500

01 · FINDABLE — ENTRY

A\$595–1,950

AI-visibility & email-deliverability audits and fixes. Credits 100% toward Phase 0 — the cold-entry door.

02 · CORE — BUILD

A\$4,500 → A\$56,500

Refundable pilot → agents A\$3,000 each → retainer. Standard Year-1 is the anchor — incl. **Founder's Bonus, A\$7,000 value.**

03 · GROWTH ENGINE

A\$1,500–2,500/mo

Weekly content, SEO+AEO, warmed outbound — recurring distribution revenue on top of the build.

04 · EXTENDED & BESPOKE

8 lines + tailored

Diagnostics, strategy, integration sprints, workshops — and **anything tailored-built to order:** apps, dashboards, custom GPTs, digital clones, personal & family AI.

Every door feeds the same engine — and the full stack is public: **comprehensive services & solutions, fair transparent pricing, pay-as-you-go, result-based** — see it live at [aaa.artigellence.com](#)

THE ASK — FOUNDING ROUND · EXPRESSIONS OF INTEREST

AAA is opening conversations with a **small circle of strategic investors** — ideally operators who know the Australian SME market. **Use of funds:** productise the six industry agent-packs into deployable IP · stand up delivery capacity beyond the founder · fund the partner-channel and AEO growth engine.

Terms discussed founder-direct. Full data room, unit economics and delivery evidence available under mutual NDA. The first conversation costs 15 minutes at this event.

THE FOUNDER-OPERATOR — WHY THIS FOUNDER, THIS MARKET

Raj Singh — Founder & Operator, Sydney. **25+ years self-employed across four industries and 38 countries**, including two decades of regulated migration consulting — high-stakes, compliance-heavy delivery sold on trust to exactly the settled, multi-business owners AAA serves today. That network is the warm pipeline.

The platform is its own proof: the entire AAA stack — live site, AI concierge, six industry verticals, delivery tooling — was designed, built and shipped by one operator using the same AI leverage AAA sells. Solo-operator input, full-team output. Every engagement founder-direct; no juniors, no agency layers.
