

AAA

by Artigellence

READ THIS BEFORE YOU COMPARE US TO ANYTHING · FOUNDER-DIRECT · SYDNEY · AUGUST 2026

WHAT WE ARE · AND WHAT WE ARE NOT · AAA-WWA-002 · AUGUST 2026 · FOUNDER-DIRECT · SYDNEY

We build working systems.

Not content. Not leads. Not chat.

AI agents wired into the tools you already run — MYOB, Xero, Cliniko, ServiceM8, your CRM, your phones — doing jobs: answering the call, chasing the invoice, following up the lead. Measured against your own baseline, reviewed weekly. **Infrastructure, not output.**

THE DELIVERY RULE · WRITTEN INTO EVERY AGREEMENT · AAA-RULE-001

Work is delivered in weekly pieces. An undelivered piece is never invoiced. Stop at the end of any week and keep everything built — source code included.

“Delivered” = built, working and handed over as agreed — due on handover, not after a testing period, never contingent on results. The pilot adds a second gate: seen working on your real data by day 10, every cent back by day 30.

01 · The comparison — same word “AI”, *four different products*

WHAT MATTERS	CONTENT AGENCY	LEAD-GEN AGENCY	CHATGPT \$20/MO	AAA · WORKING SYSTEMS
What you are actually buying	Views & reach	More enquiries	Answers when you ask	Agents that do jobs calls · invoices · follow-ups
Works without you	✗	✗	✗ only when prompted	✓ runs while you sleep
Wired into your systems MYOB · Xero · Cliniko · ServiceM8	✗	● CRM only	✗	✓ sits above, never replaces
Fixes what happens after the lead arrives	✗	✗ sells you more inputs	✗	✓ the follow-up is the product
Measured against your baseline	✗ views ≠ invoices	● leads counted, revenue isn't	✗	✓ weekly report, same numbers
You own it when you stop paying	✗	✗	✗ subscription	✓ agents and code you own
Your risk if it does not work	Your spend	Your spend	\$20 + your time	Nothing invoiced until it is delivered

ABN 83 988 690 362 · Sydney, Australia

aaa.artigellence.com · raj@artigellence.com

02 · Architect, orchestrator & optimiser — *three jobs, one operator*

DESIGNED BEFORE ANYTHING RUNS · RUN AS ONE OPERATION WITH A HUMAN WHEREVER MONEY MOVES · TUNED AGAINST NUMBERS YOU CAN SEE

03 · Where businesses actually *leak*

THE STAGE	WHAT USUALLY HAPPENS	WHAT AN AGENT DOES INSTEAD
Lead arrives	Followed up slowly, or never — the single biggest leak in most SMEs	Answered in minutes, around the clock, logged where you can see it
Quoted	Sent, then forgotten; chasing feels like nagging so it does not happen	Followed up on your schedule, in your tone, with the reply logged
Invoiced	Late payment is the norm — roughly A\$30K a year, on average, for an Australian SME (GoCardless 2025)	Chased automatically, matched to each customer’s history and tone, you approve before it sends

This is why “more leads” is rarely the answer. More leads into a leaking funnel is a bigger leak. AAA patches the funnel you have already paid for — and your real numbers get baselined in week one, not assumed here.

The questions everyone asks. *Straight answers.*

The word “AI” covers four very different products. Here is exactly where AAA sits, in plain words — ask any of these in person and you will get the same answers.

THE QUESTION	THE ANSWER
“A video got two million views — isn’t this AI stuff easy?”	Reach is hard and worth respecting, but it is a different job: views do not invoice anyone. AAA automates the work that gets paid — calls answered, invoices chased, quotes followed up. Viral content is marketing. This is operations.
“Agencies charge per lead — they show results.”	Agencies sell you more inputs. AAA fixes what happens after the lead arrives, because when a funnel gets baselined the leak is almost never “not enough leads” — it is slow follow-up. We measure yours in week one and both look at the same number.

THE QUESTION	THE ANSWER
“I already use ChatGPT or Claude — it’s \$20 a month.”	Good, then you have seen the engine. Now ask it to chase your debtors at 7am and log the responses in MYOB while you are at your kid’s soccer. Chat answers when you ask; agents work when you don’t. The \$20 is the engine — AAA builds the vehicle, drives it and services it.
“I tried vibe coding — I can build this myself.”	You probably can build a demo — that is the fun twenty per cent. The other eighty is what an engagement covers: permissions, security, error handling, uptime, and something that still runs in month six. A prompt is a conversation; production is a responsibility.
“It’s all Claude — you just change the names.”	Yes — AAA uses these models the way your accountant uses Excel. You are not paying for the typing. You are paying for knowing what to build, wiring it into your systems, and being accountable to your baseline. That is why nothing is invoiced until it is delivered: judge the working agent, not the document.
“Did a human even write this document?”	Our own systems drafted it — and that is the point. AAA runs the same systems it sells. The documents come from the machine; the conversation, the design and the accountability are the founder’s — www.rajsingh.online . You are seeing the product before you have bought it.
“You’re new — why should we trust you?”	The brand is young; the operator is not — 25 years self-employed across four industries and thirty-eight countries, an Australian operating entity since 2003, live production builds you can open right now — aaa.artigellence.com —, and paying engagements underway across multiple Australian SME industries. But the real answer is the model: nothing is invoiced until it is delivered, the pilot is watched working on your real data by day 10 with every cent back by day 30, everything runs in your systems on your data, and the same numbers are reviewed together weekly. New earns trust by removing your risk, not by asking for it.

What AAA also builds — *beyond the agents*

PRODUCT	WHAT IT IS	PRICE INCL GST
Agents & Automation	The core — systems that do the work, on the software you already run	Pilot A\$4,500 · agents A\$3,000 each
Traction incl. Findable	Found, published, tracked, converted — the weekly growth engine. Built and handed over, or run monthly by AAA.	From A\$750/mo or A\$13,500-19,500 built
Tractus	Keep every person you meet at an event — your pitch behind a QR, the memory, tracked follow-up. Form-free.	Free · then A\$29/mo
Built on request	Custom operations systems, apps and portals, websites new or rebuilt, second-brain GPTs, media packs	Quoted in writing, 24-48h

How to start — the whole flow, *nothing hidden*

1 · MATCH YOURSELF	2 · ONE LINE, OR ONE CALL	3 · NDA & SCOPE	4 · THE PILOT
Four questions on the site — your agent, your price and your first week, in about sixty seconds. Free, no form gate. aaa.artigellence.com/wizard.html	Send the job eating the most hours, or book thirty minutes. Founder-direct, no juniors, reply within 24 hours. cal.com/raj-aaa/aaa-discovery	Mutual NDA on request , then one-page engagement terms — every stage scoped and agreed in writing before it starts. No surprises, ever.	A\$4,500 . One agent live on your real data by day 10, watched working before you decide. Continue, or every cent back by day 30. Never charged on results.

THE FIRST THING WE AGREE ON · BEFORE ANY MONEY MOVES

Not a promise of outcomes — nobody honest guarantees those. **A number**: the one that has to move for you to call this real. Written down, baselined from your own systems in week one, reviewed together every two to four weeks. If it moves, you will see it. If it does not, you will see that too — and no fee in any AAA engagement is contingent on an outcome, in either direction.

And plainly — what we are *not*

NOT THIS	BECAUSE
Not a content or social agency	We do publish, inside Traction — but the product is the system underneath it, not the posting. If all you need is reach, an agency will do it cheaper.
Not a lead-generation service	No lead lists, no per-lead pricing, no promises of enquiry volume. AAA works on what happens to the enquiries you already get.
Not a software licence	Nothing is rented back to you. The agents, prompts, credentials and code are yours from the day they are delivered, and they keep running if you stop.
Not a big agency, deliberately	Ten client slots. One operator, AI-augmented. The person who scopes your work builds it — which is the whole point, and also the reason the calendar sometimes says no.
Not a guarantee of outcomes	Nobody honest guarantees revenue. What is guaranteed is the work: delivered before invoiced, measured against your own baseline, reported weekly whether the news is good or not.

WHY THE AU STACK MATTERS MORE THAN IT SOUNDS

The major AI labs now ship small-business tools of their own — built for an American software stack: QuickBooks, PayPal, HubSpot. The systems most Australian SMEs actually run — Cliniko, Halaxy, Best Practice, MYOB, Xero AU, ServiceM8, Tradify, simPRO, AroFlo, LEAP, Smokeball, PEXA — are not on those roadmaps. Their own framing concedes the point: small businesses do not set these systems up themselves. **Tools commoditise; the operator who connects them to your business does not.**
